

# Car Seat Mounting Kits

The car seat mounting kits (CSMK) are made to securely fix DEWETRON data acquisition systems to the front, center or back seat of nearly any vehicle. The CSMK is an important tool to help test engineers in instrumenting a test vehicle with a DEWETRON system quickly and safely.

- Quick and safe installation
- Robust metal construction
- Heavy duty straps for car seat fixing

# Shipping/Carrying Cases

For almost every portable model that we make a shipping case is available. These are common-carrier rated shipping cases made of high impact materials. Most of them feature a pull-out handle and wheels, so that you can easily pull them.
