CLONING RECORDERS

 A Recorder can be cloned by Copy-and-Paste

LINKING RECORDERS

- 1) | Select Link Mode
 - Independent
 - Adjacent instruments => Lnk
 - Instruments on page => Pag
 - Instruments in same group
- Adjacent instruments, links recorder to another recorder which are directly next to each other and is denoted with a "Lnk"
 - Instruments on Page, links all recorder on one page/measurement screen and is denoted with a "Pag"
- Instruments in same group, links recorder also on different pages and has no denotation, the group names can be freely chosen

RECORDER & A/B, A2/B2 and C/D CURSORS

DEWETRON

- Activate the Cursors with the *Cursor*button
 The A/B cursors can be moved with the mouse
- Actual position and signal value for all signals in the Recorder can be seen in the table below
- 3 Certain Statistics for the signal between both cursors can be selected in the Recorder Properties
- 4 Cursors can be renamed in the popup, which opens with a click on the cursor name. Deactivating and activating cursors again keeps the individual name stored and cursors of several Recorders can be renamed individually
- (5) Copy and paste table content

Remark: Cursor can be moved simultaneously when pressing *shift*. This is also true for C/D cursor.

Remarks:

- Cursors are only applicable in Freeze and PLAY mode
- Cursors can be activated for Recorder, Chart Recorder and Scope

RECORDER COPY CURSOR VALUES TO CLIPBOARD

With a left click with the mouse on this button, the A/B cursor values can be copied to the clipboard and pasted, for example, in an Excel list.

This operation also works with the key combination "CTRL" + "C" if youhave selected the recorder instrument.

RECORDER Multiple Tables and Marker

While in LIVE mode and freeze active or in PLAY mode, the A-B cursor can be activated. It's table can be split up to 4 times and copied to the clipboard.

Additionally, up to 10 single value markers can be added to the recorder and this table can also be copied to the clipboard

Remark: A-B cursor and Marker can be renamed and set to a specific time by clicking on them.

RECORDER & LABELS

DEWETRON

- Activate the labels with the "Data Label" button. It is now possible to display the labels in the recorder at the position selected with the mouse. The fixed setting of several labels is only possible for recorded measurements.
 - If activated, all set labels will be dispalyed, if deactivated the set labels will be hidden
- 3 Labels can be deleted by pressing "X" on the right top of the label.

Remarks:

- If 1 is deactivated the mouseover labels will be disabled. The inserted labels will be visible.
- \rightarrow If (2) is deactivated all labels of this recorder will be invisible

DEJAVIEW – REVIEW DATA WHILE RECORDING

- 1 Select a Recorder and move the data to the left
 - Go back until data of interest is reached;
 The mouse wheel, box zoom with right
 click and adjustment of axes scaling can
 be used to zoom into the data
 The orange box in the Overview bar
 marks the actual position in the data file
- 3 Enbale A/B cursors for detailed data analysis; Cursor position can be changed with the mouse
- Go to the Recorder properties (double click on the Recorder or open Properties menu on the right hand side) for measuring predefined values between both cursors
- (5) When finished press the >> button to jump back to the actual data
