- > Secure Boot available and enabled
- > Includes MSN certified TRION drivers (available since TRION API R3.6 from 06/28/2019)
- > Windows 11 IoT Enterprise 2024 LTSC installed.
- > Packages enabled:
  - Hyper V
  - Credential Guard
  - TPM activated

## OVERVIEW OF DoD-READY DEWETRON INSTRUMENTS

DoD-ready is an option which needs to be ordered separately (OPT-SECURE-BOOT) and can be implemented only when the data acquisition instrument is being manufactured. Already delivered instruments can't be upgraded.

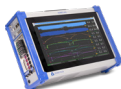

Please also keep in mind that DEWETRON only offers DoD-ready instruments, the customer or rather their IT department has to finalize the instruments to be fully DoD compliant.
